KEY FEATURES

Stand water purification with inverter

Smarter energy use

Smart Inverter technology helps reduce energy use.

Generous capacity

A 7.5-litre tank stores cold water.

Internal hygiene

Four filtration stages work together.

Everyday convenience

A spacious opening makes dispensing easier.

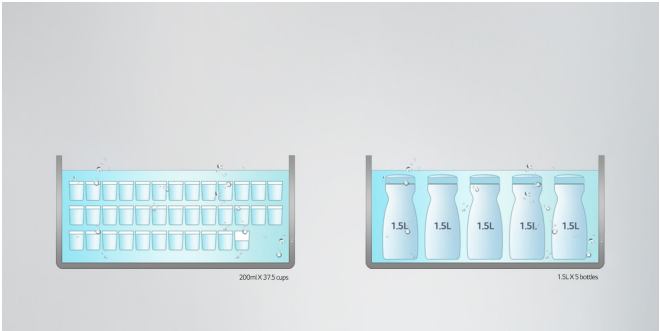

Details that fit your day

SMART INVERTER

Cooling that responds to demand

Smart Inverter compressor technology adjusts cooling operation to suit demand.

COLD-WATER STORAGE

7.5 litres, ready for everyday use

A generous cold-water tank supports daily household routines.

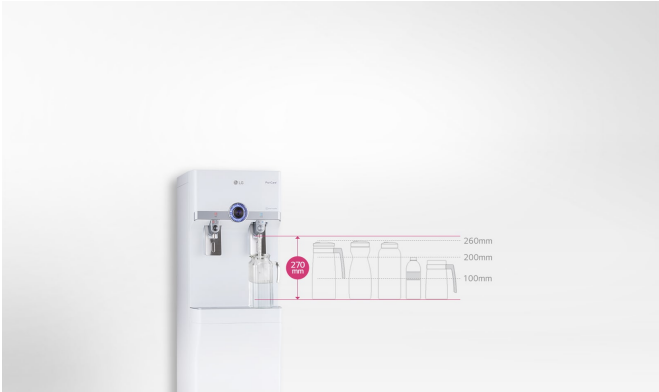

FILTRATION

Four stages in one system

Water passes through a four-stage filtration system.

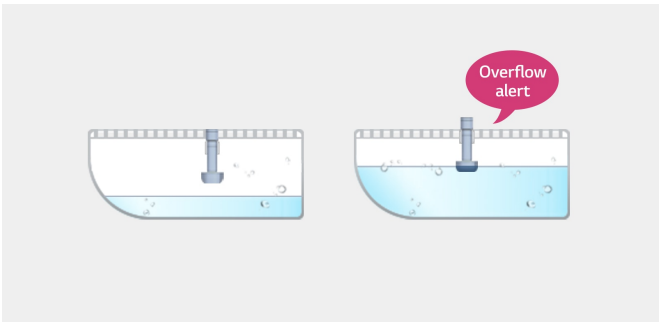

Details that fit your day

DISPENSING SPACE

Room for taller bottles

The dispensing opening accommodates bottles up to 270 mm tall.

DRIP TRAY

A little more room between emptying

The 1.9-litre tray includes a water-level indicator.

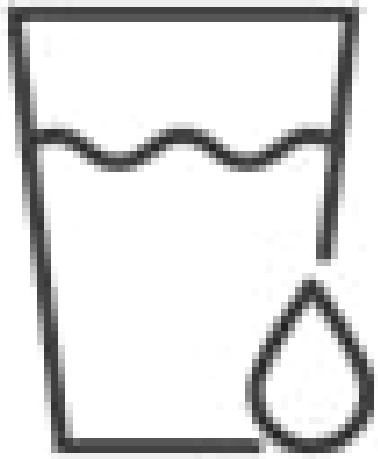

COMPRESSOR WARRANTY

10-year parts coverage

Coverage applies to compressor parts only, subject to LG warranty terms.

Details that fit your day

STEP 1

Cool the water

The cooling cycle lowers the water temperature.

STEP 2

Assess cooling demand

The system checks the cooling capacity needed.

STEP 3

Optimise cooling control

Cooling operation adjusts to demand.

Details that fit your day

STEP 4

Support energy savings

Inverter control helps save energy.

Material	Bacterial Growth (CFU/ml)
